

D:\python> day 4> function with argument.py

function with argument.py

```

1 def sum(a=6,b=8):
2     print(a+b)
3     sum(10,20) #calling with argument
4     sum()      #calling without argument
5
6     #keyword argument
7 def sum(a,b):
8     print("sum is :",a+b)
9     sum(b=10,a=20) #calling with argument
10
11    #non keyword argument
12 def add(*num):
13     sum=0
14     for n in num:
15         sum=sum+n
16     print("sum:",sum)
17     add(10,20)
18     add(10,20,30)
19
20    #keyword argument
21 def my_function(**arg):
22     for i,j in arg.items():
23         print(i,j)
24     my_function(Name="Rohit",lastname="Makwana")
25

```

34 1

Run: function with argument

```

C:\Users\Rohit\AppData\Local\Programs\Python\Python38\
30
14
sum is : 30
sum: 30
sum: 60
Name Rohit
lastname Makwana

Process finished with exit code 0
